

SOUNDSCAPES

SOUNDSCAPES

Music grounds us in the spaces we share...

SOUNDSCAPES

SOUNDSCAPES connects visitors to natural landscapes through sound.

The synergy of listening and being immersed in a natural environment, enables visitors to connect with a place in a more vivid and emotionally enriched way.

Immersive SOUNDSCAPES in beautiful landscapes.

REFLECTIVE

During the day, visitors stroll through gardens and woodlands, stopping at the side of paths and taking time to soak up each audio experience. Guided by sound, each of these audio experiences encourage visitors to completely immerse themselves in nature and be present in their own surroundings.

Different sounds can create different interactions with sound and nature. SOUNDSCAPES enables each outdoor space to sing their own song, by curating a unique soundtrack that acts as an avenue to create experiences and memories rooted in deep connections.

Unlike most trails, SOUNDSCAPES focuses purely on sound to heighten ethereal ties to environments. It is suitable for all outdoor locations that inspire a sense of space and place.

Spaces that sing

MEDITATIVE

Different options:

'Plug in and play'

- An audio experience only
- This can be installed as a free flow experience or a set route
- This is a generic option that tours

Audio trail created for a specific landscape/environment

- Option to create an after-hours ticketed experience
- Can be designed bespoke to a single venue/landscape
- Can feature different zones, offering a mixture of audio

Narrative based audio trail with showcase finale piece

- Option to create an after-hours ticketed experience
- Can be designed bespoke to venue/landscape with a curated narrative
- Narrative based audio trail which builds up to a finale piece

How does the event work?

CAPTIVATING

While music remains core to SOUNDSCAPES's connection with people and place, it is malleable. SOUNDSCAPES may be an avenue to explore and engage marketing strands, commercial programmes, and outreach initiatives.

Celebrity Links

Amazing spaces often have famous patrons. They could be approached to pick a piece of music that embodies their connection with your site. This makes use of already established connections that marketing and creative teams can further explore.

Grounding Voices

It doesn't just have to be music. Prose and stories from artists, children, and communities could embellish the experience of SOUNDSCAPES and heighten connections between space, place, and people.

Additions...

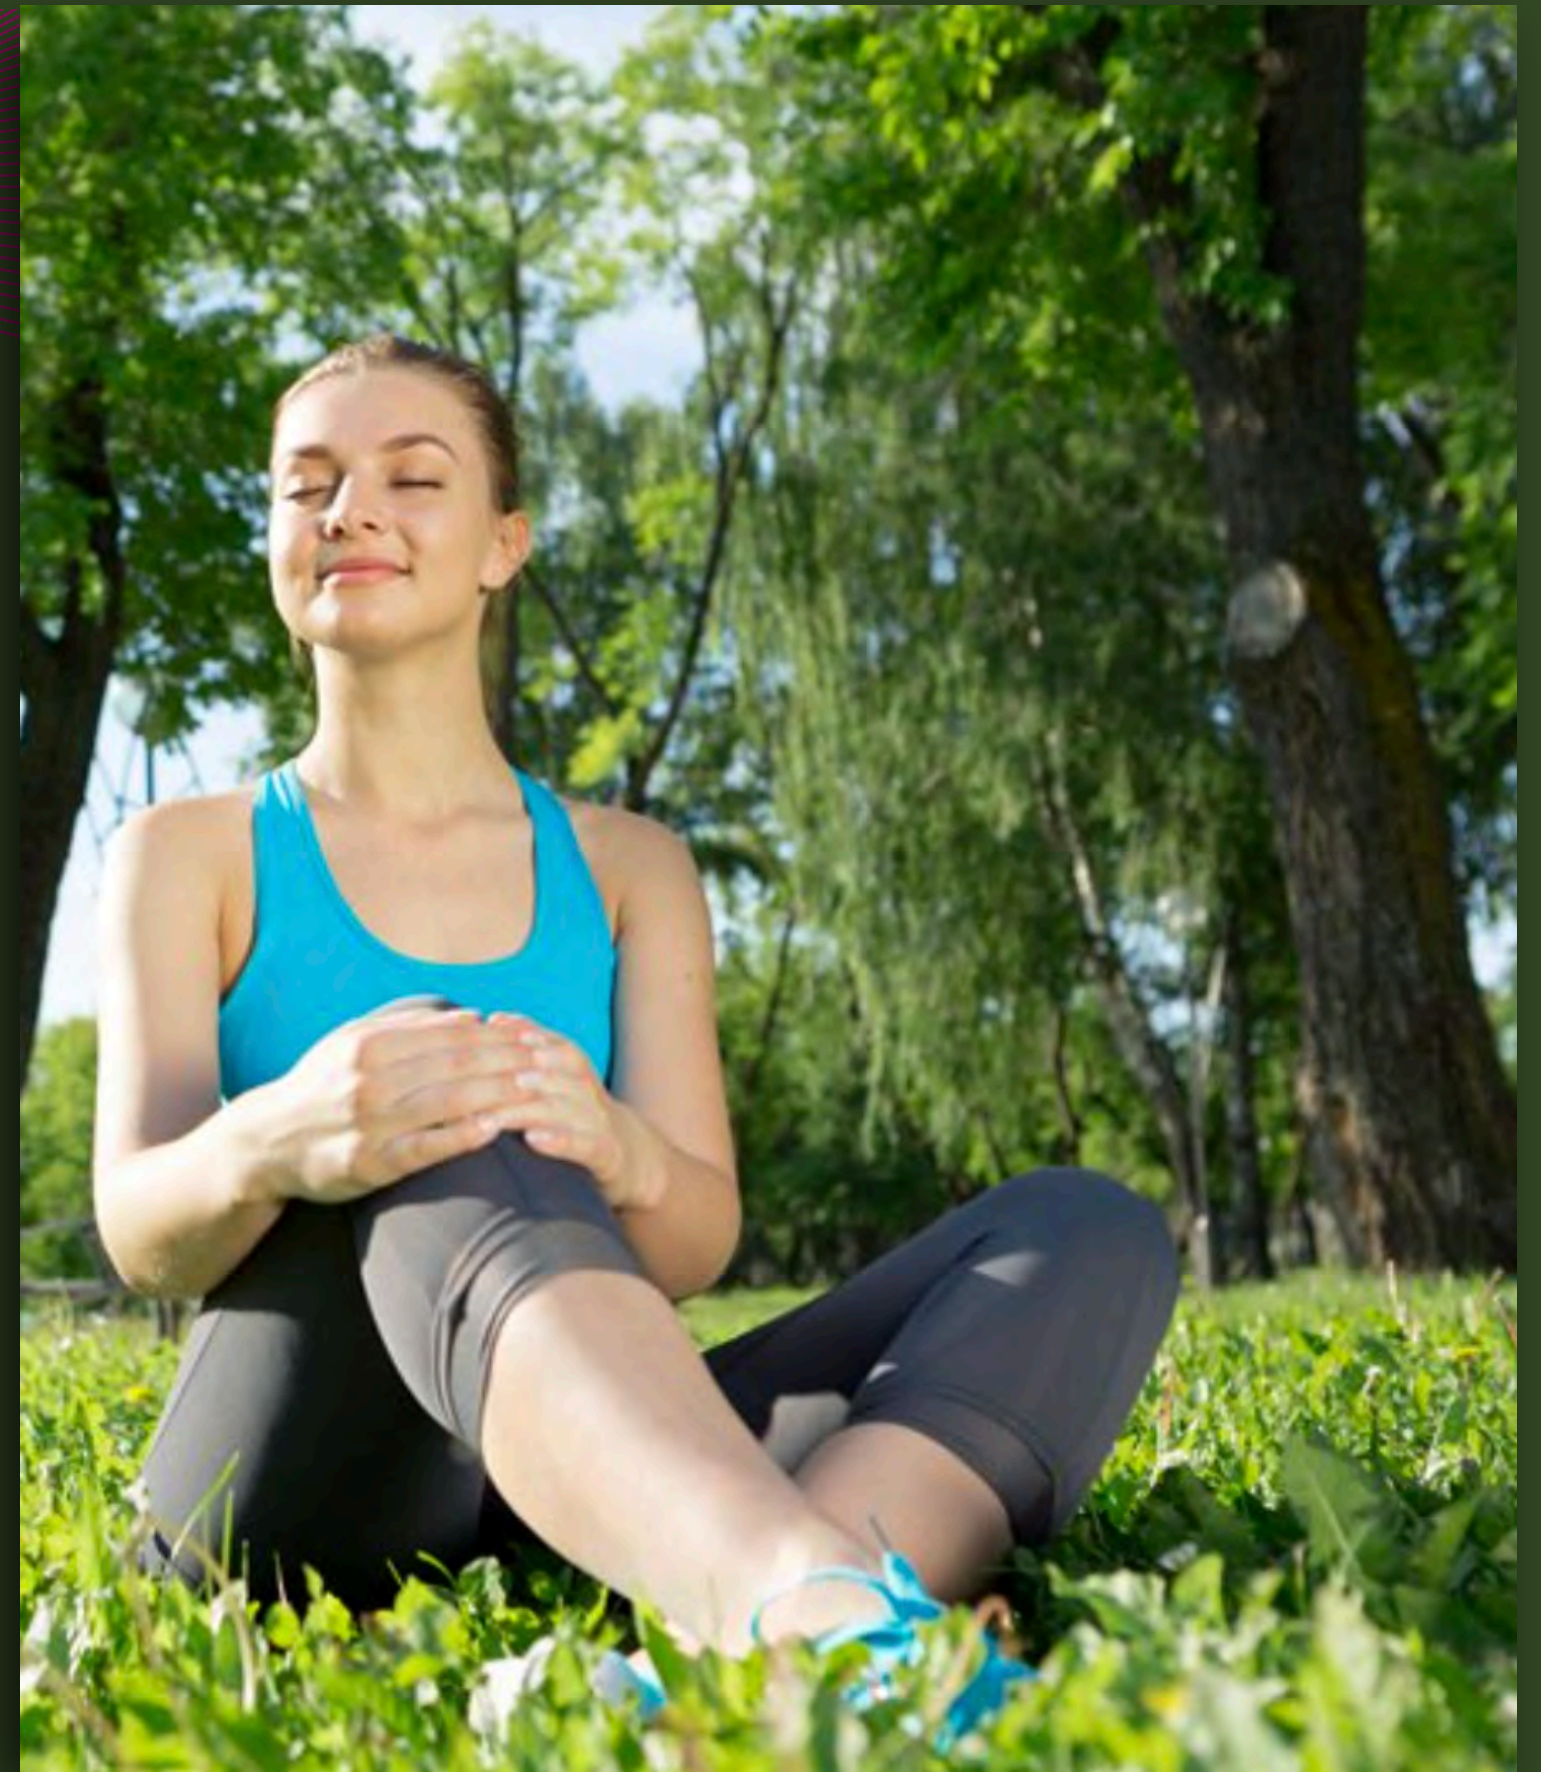

WELLNESS

Wellness Groups/Sessions

SOUNDCAPES's ability to ground people with their surroundings and other visitors, means it makes a fantastic package that can be created and offered to wellbeing groups and initiatives, commercial and private.

This approach allows for group bookings and links in well with corporate wellness programmes, developing links with local businesses and/or other community groups.

Business connections

SOUNDSCAPES

Event footprint

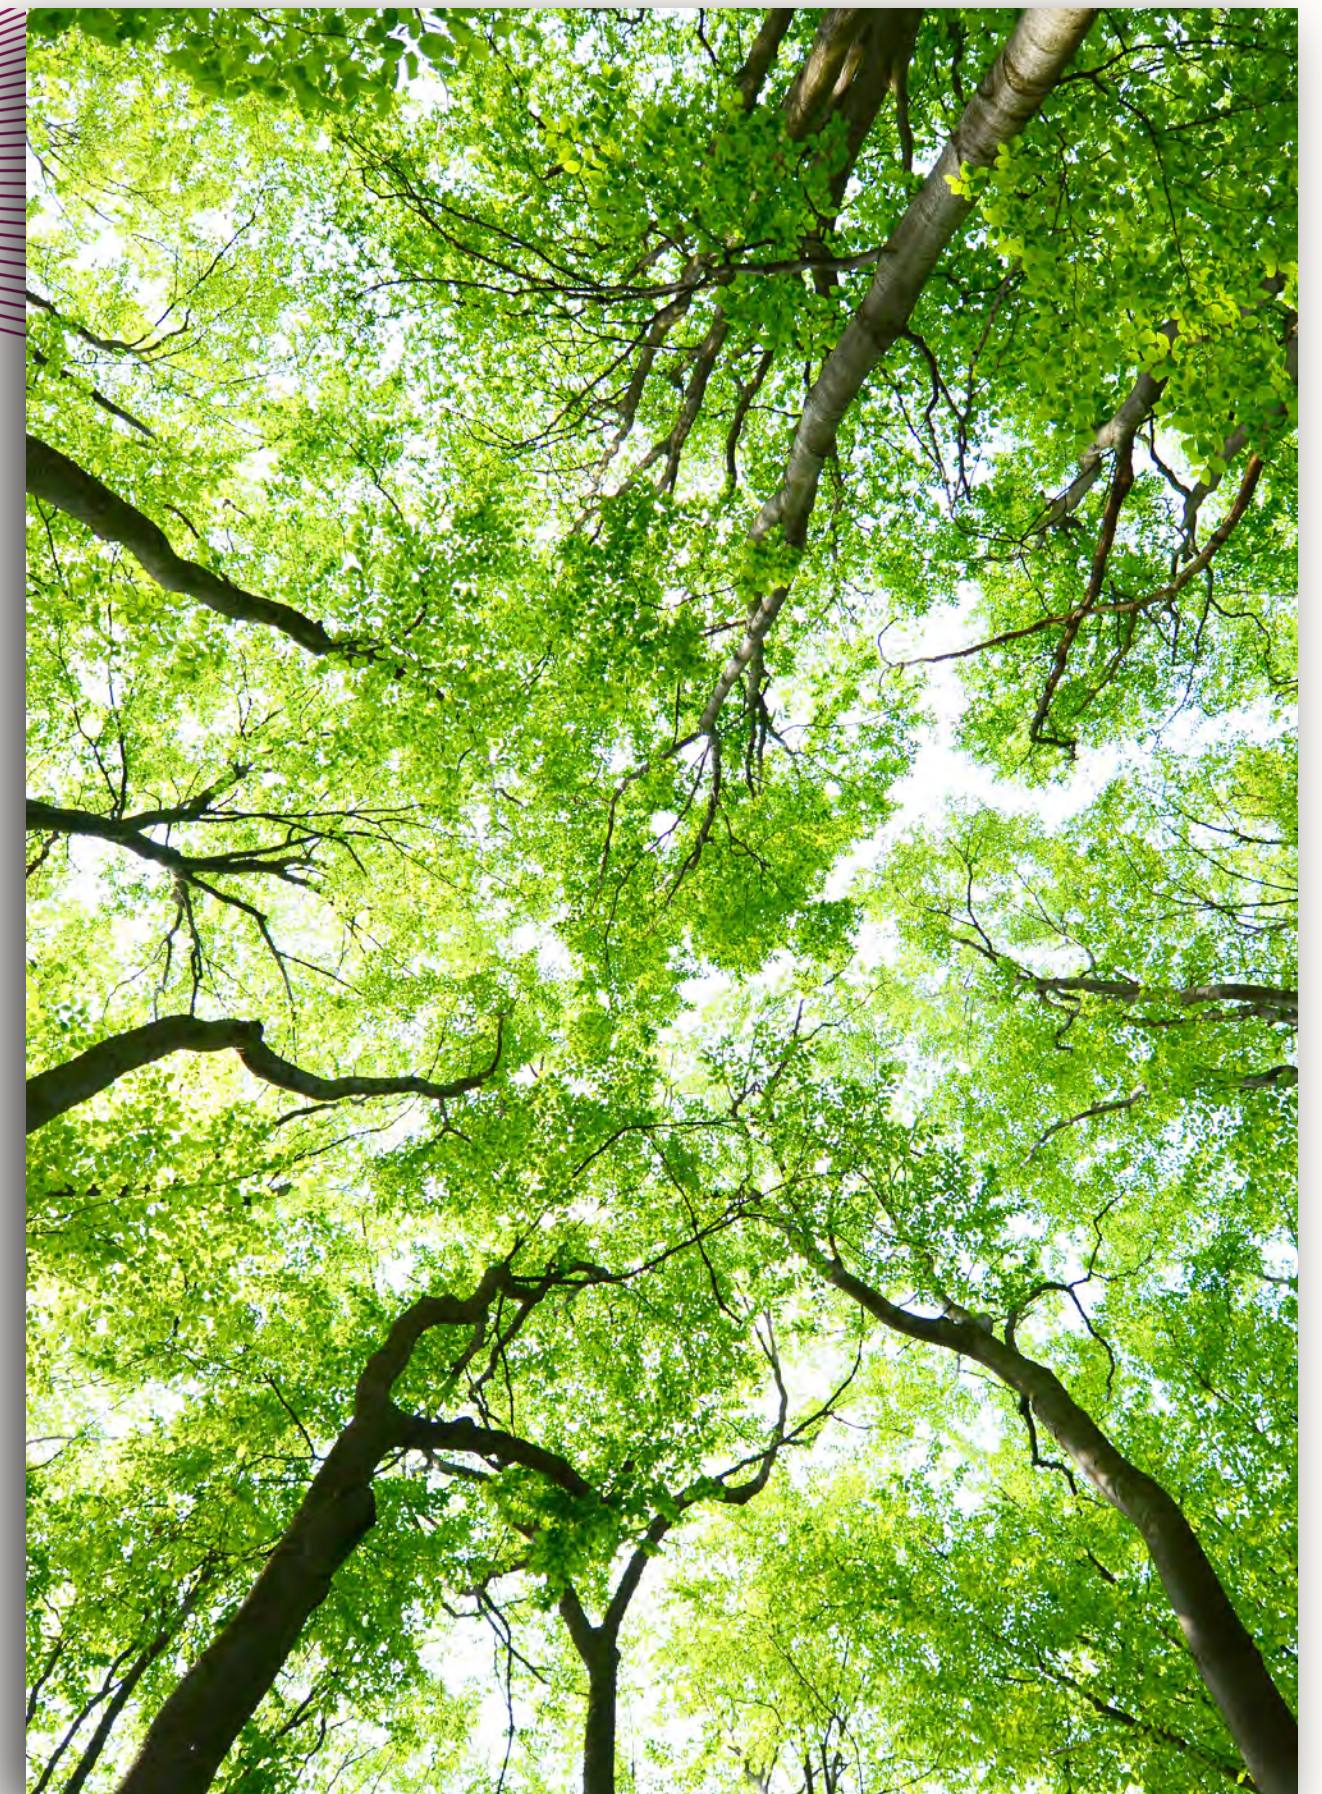

Infrastructure will differ depending on content however, a purely audio experience requires a fairly low-level of infrastructure to be put in place.

SOUNDSCAPES offers a cost effective and environmentally-conscious event to elevate the spaces we care for.

Culture Creative provide creative solutions for cultural projects and events. They specialise in site-specific projects in heritage and landscape settings, providing project, production, and event management and consultancy.

Tube is a high performance sound design and equipment company for the live events industry. Tube deliver a high-quality of sound to audiences large and small, from local community projects to crowds of over 50,000 people.
